

A STORY OF RELIABILITY

Born in the '70s, BM becomes specialized about design, manufacturing and distribution of furniture accessories such as handles and technical articles useful even for other applications.

At present, the company boasts a recognized and appreciated experience by the customers all over the Italian territory and even outside.

Through solid partnerships strictly connected with major distributors and final users, BM brand is in wide extension all over foreign markets: we are an important reference point in terms of production flexibility and processes quality.

BM TARGET: ENSURING QUALITY AND STYLE

We have always followed a philosophy based on quality expressed in each side and aspect of industrial development.

- Excellent technology and innovation
- High performing projects
- Wide range of processes
- Finished product quality
- Value for money
- Prompt deliveries

Thanks to our excellent teamwork and synergies with our business partners, Bm products are high performing and answer to the specific requirements and market needs.

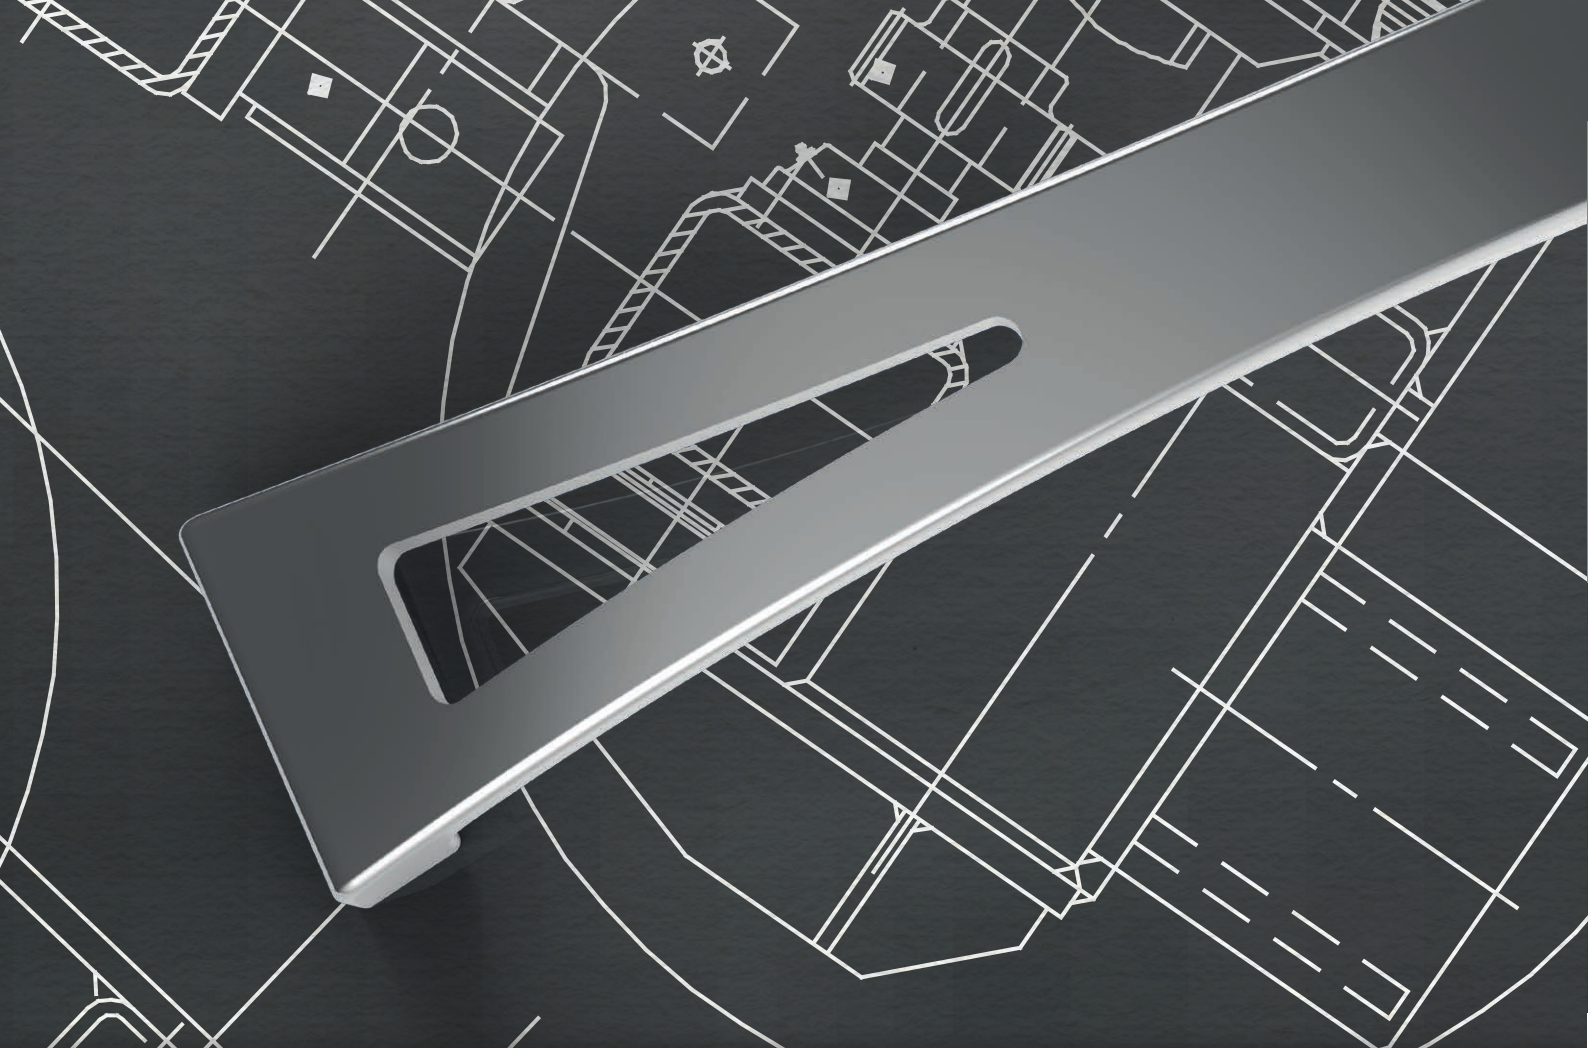

EACH IDEA THE PROPER PROCESS

Experience and technology we have been expressing by our manufacturing processes since more than 40 years have made BM specialized in different industrial processes such plastic and metals, making their application introduced beyond the furniture's world.

Moulding, turning, aluminium extrusion, satin finishing and galvanic baths are supported by high technology equipments: all that allows BM to be the **ideal partner for anyone requiring excellent quality industrial process.**
